

SAN FRANCISCO-SEPTEMBER 3, 2009- Embracing the environment with a touch of glamour, A Lot To Say, Inc proves you don't have to forego fashion for sustainability. Our products featured at Go Green Expo's ECO-LUXE event will give you both.

Our shirts, scarves, umbrellas and totes feature different "green" messages both positive and edgy reminding you and those around you how easy it is to LOVE your planet and CHANGE your habits. Our products are made with 100% recycled bottles and a NO WATER printing process that saves, at least 15-25 gallons of water per garment. But there's still A Lot (more) To Say:

- Every A Lot To Say tee uses a revolutionary process that transforms a plastic bottle into a luxurious product that rivals the touch of cashmere.
- Besides comfort our shirts will keep you warm, keep moisture at bay, release stains, eliminate odors and kill germs.
- Every A Lot To Say tee is 100% free of toxins. In fact, they require 70% less energy to produce, thus eliminating hazardous by-products and ensuring no toxins will ever touch the people we love.
- Indulge in our scarves, totes and umbrellas and accessorize your "green" beliefs with products made from the same eco-friendly process. Or pamper your mind, body and soul with our yoga line.
- All of the messaging on our products is based on fact. They engage, inspire and encourage us to do simple, everyday things that conserve our resources and keep our planet a greener, healthier, happier place.
- Every A Lot To Say tee is created, dyed, sewed, manufactured and shipped within the U.S.A. The making of these shirts keep people employed, keep jobs in the USA and protest sweatshop labor.
- Our products have been seen at the Grammy Awards, Sundance Film Festival and The Image Awards, featured on Treehugger.com and endorsed by Sophie Ulano, author of "Gorgeously Green, 8 Simple Steps to an Earth-Friendly Life," and the current issue of "Organic Spa."
