Special Go Green Expo **Fuel** Screening with Peter Fonda and Mariel Hemmingway

Friday, January 23 at the Go Green Expo, Los Angeles Convention Center

Screening begins at 5:00PM

After Panel with Peter Fonda and Mariel Hemmingway at 7:00PM

Oscar contender *Fuel* is an insightful portrait of America's addiction to oil and an uplifting testament to the immediacy of new energy solutions. Director, Josh Tickell, a young activist, shuttles us on a whirlwind journey to track the rising domination of the petrochemical industry -- from Rockefeller's strategy to halt Ford's first ethanol cars to Vice President Cheney's petrochemical company sponsored energy legislation -- and reveals a gamut of available solutions to "repower America" --from vertical farms that occupy skyscrapers to algae facilities that turn wastewater into fuel. Tickell and a surprising array of environmentalists, policy makers, and entertainment notables take us through America's complicated, often ignominious energy past and illuminate a hopeful, achievable future, where decentralized, sustainable living is not only possible, it's imperative.
